

Smarter energy checklist

Understand your energy

Get to know your home and how you use energy

- ☐ **Check your roof orientation**
Which way does your roof face?
- ☐ **Check your sunshine**
How much sun does your roof get?
- ☐ **Track your weekly driving**
How many kilometres do you travel?
- ☐ **Check your daily electricity use**
How much power does your home use?
- ☐ **Find your biggest energy users**
Heating? Hot water? Cooking?
- ☐ **See when you use the most power**
Morning, afternoon or evening?

Northpower

Optimise your energy

Make the most of your new electric setup

-  **Charge your EV when power is cheaper**
Use off-peak times where you can.
-  **Use your solar while the sun is shining**
Run appliances and charge devices during the day.
-  **Shift your electricity use**
Move flexible tasks away from peak times.
-  **Check your energy use regularly**
Use your energy app or monitor.
-  **See what's changed**
Compare your energy use before and after.

From solar and EVs to smarter energy use, explore advice and resources from Northpower.
